## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Calabria (5,284,473). Calabria discloses, in the figures, a tool with a guide tube (1), an expandable body (4), a nozzle (5), a first lumen (2) in the guide tube, and a second lumen (3) in the guide tube. Note: The introductory statement of intended use (“for insertion into bone having cortical bone surrounding an interior volume occupied, at least in part, by cancellous bone”) has been carefully considered but deemed not to impose any structural limitations on the claims patentably distinguishable over Calabria’s device, which is capable of being used as claimed if one desires to do so.

### **Conclusion**

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Crocker et al. (5,295,962), Goodin (5,397,307), and Slepian (5,947,977) teach tools each with a guide tube, an expandable body, a nozzle, and lumens in the tube.
